

Temperature Screening Protocol

The screeners will be using the protocol below:

- Read the directions for the No -Touch Thermometer
- Take Temperature: in a controlled environment to prevent false readings
- example – mini mobile trailer
- Take Temperature: At arm's length, using the infrared **non-contact** thermometer, point to the person's forehead about 1 to 2" away and activate thermometer.

If a person has hair overlapping on forehead, ask person to lift up hair, to expose skin on forehead. Refer to specific model's operating instructions.

- **DO NOT TOUCH THE PERSON'S SKIN.**
 - **Some thermometers require 20-second "rest" between tests for accurate reading Skin must be DRY for accurate reading.**
 - If temperature is less than 100.4 (100.3 and BELOW) --> allow team member to project site access and NO FURTHER ACTION
 - If temperature is 100.4 or greater:
 - Give team member surgical mask and have them sit to side for 30 seconds and RE-TAKE TEMP
 - If less than 100.4 then allow team member to enter site
 - If 100.4 or greater, team member can **NOT** enter site
 - State to team member:
At this time, your screening does not meet the project site criteria. Please contact Axiom (877-502-9466) for further health guidance.
 - Give team member **RETURN TO WORK GUIDELINE** (see below)

RETURN TO WORK GUIDELINES

GLDD cares about you and your health. Due to the COVID-19 situation, we must remain vigilant in managing the situation across the company and apply an abundance of caution in ensuring everyone's health and safety. We recognize that in many of our locations it is also the cold and flu season, and symptoms for these illnesses can be similar to the coronavirus.

Per our temperature monitoring protocol, you are being denied site access due to having a temperature of 100.4 or higher. In order to be allowed site access you must:

- Be fever free for 48 hours, without use of fever reducing medication.
- GLDD will require a fit for duty document from a doctor.
